

# Landing page for mobile app

\*\*\*Here I want to share how I had create a landing page for food app\*\*\*

- I use html,css language to create a landing page for a food app.
- The food application I used **Foodiepal**.
- Now I will share the code which that I had learned to create the webpage for Foodiepal.

## Html code:

---

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>FoodiePal - Your Food Companion</title>
  <link rel="stylesheet" href="styles.css">
</head>
<body>
  <header>
    <h1>FoodiePal</h1>
    <p>Your Food Companion</p>
  </header>
  <section class="hero">
    <h2>Discover, Order, Enjoy</h2>
    <p>FoodiePal is your ultimate companion for exploring culinary delights, ordering delicious meals, and satisfying your cravings with just a few taps.</p>
    <a href="#download" class="cta-btn">Get FoodiePal Now</a>
  </section>
  <section id="download" class="download-section">
    <h2>Download FoodiePal Now!</h2>
    <p>Start satisfying your cravings today.</p>
    <div class="app-store-buttons">
      <a href="#" class="app-store-btn">Download on the App Store</a>
      <a href="#" class="play-store-btn">Get it on Google Play</a>
    </div>
  </section>
  <footer>
    <p>Copyright © 2024 FoodiePal. All rights reserved.</p>
```

```
</footer>
</body>
</html>
```

---

### Css code:(styles.css)

---

```
body {
  font-family: Arial, sans-serif;
  margin: 0;
  padding: 0;
}
```

```
header {
  background-color: #ff6347;
  color: white;
  text-align: center;
  padding: 20px 0;
}
```

```
.hero {
  text-align: center;
  padding: 50px 20px;
  background-color: #f8f8f8;
}
```

```
.cta-btn {
  display: inline-block;
  background-color: #ff6347;
  color: white;
  padding: 10px 20px;
  text-decoration: none;
  border-radius: 5px;
  margin-top: 20px;
}
```

```
.download-section {
  text-align: center;
  padding: 50px 20px;
  background-color: #f8f8f8;
}
```

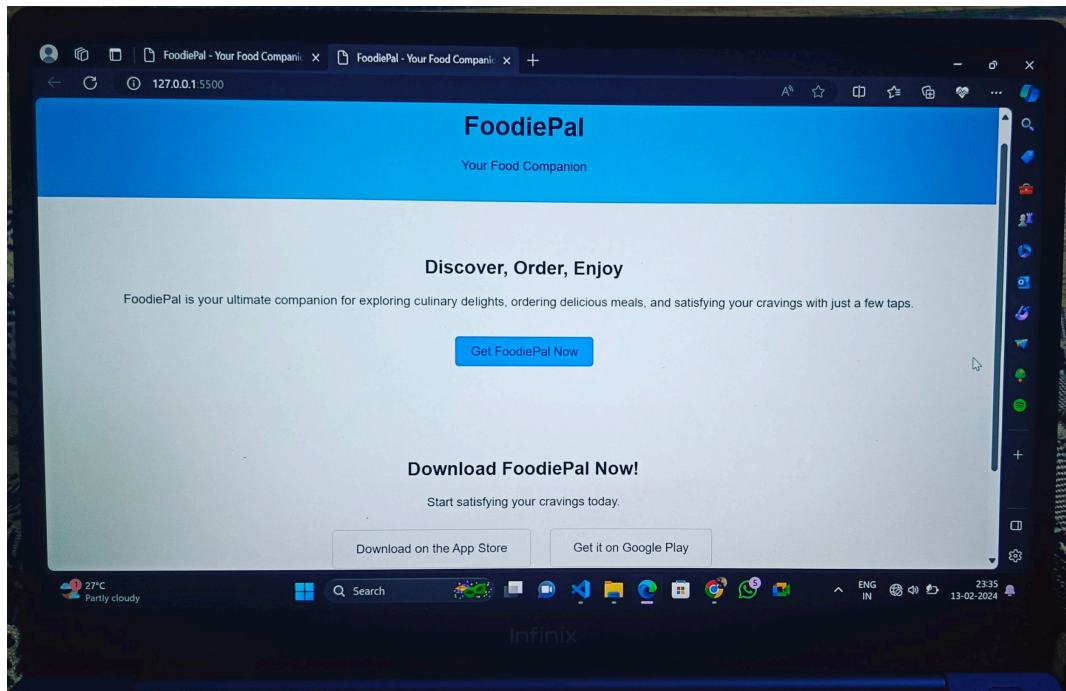

```
.app-store-btn,
.play-store-btn {
```

```
display: inline-block;
background-color: #f8f8f8;
color: #333;
padding: 15px 30px;
text-decoration: none;
border-radius: 5px;
margin: 10px;
border: 1px solid #ccc;
}

.app-store-btn:hover,
.play-store-btn:hover {
background-color: #ccc;
color: #333;
}

footer {
background-color: #333;
color: white;
text-align: center;
padding: 20px 0;
}
```

- 
- This code create a landing page with header, hero, section, download section, and footer.
  - And we can use the css for customize the content ,styles, text alignment, text colors, background colors etc.
  - Using of (vs code) I had run this codes and the outcome of this program I had attach below.

- This was the **Foodiepal website** .
